Notice No. below

US Army Corps of Engineers, Pittsburgh District
1000 Liberty Avenue
Pittsburgh, PA 15222-4186

Application No. LRP-2012-405

Date: June 14, 2012

Notice No. 12-35

Closing Date: July 14, 2012

1. TO ALL WHOM IT MAY CONCERN: The following application has been submitted for a Department of the Army Permit under the provisions of Section 404 of the Clean Water Act.
2. APPLICANT: Rob McHale
MarkWest Liberty Midstream & Resources, LLC.
601 Technology Drive, Suite 130
Canonsburg, Pennsylvania 15317
3. LOCATION: The project is located along Calis Majorsville Road in Majorsville, Marshall County, West Virginia. Approximate coordinates for the center of the proposed project are: 39°57'35.90"N, 80°31'24.38"W.
4. PURPOSE AND DESCRIPTION OF WORK: The applicant proposes to construct the Majorsville 3/4/5/6 Natural Gas Processing Facility. The proposed work would include the clearing and grading of 58 acres to provide the footprint necessary to build the processing facility and the construction of 2 span bridges over Enlow Fork. Facility components include: 4 cryogenic plants and 3 de-ethanizer units capable of processing 800 million standard cubic feet per day (MSCFD) of natural gas. The existing facility (Majorsville 1/2) on the north side of Enlow Fork processes approximately 270 MSCFD and cannot meet the incoming demand. Combining the existing facility with the proposed expansion will result in a capacity to process approximately 1,070 MSCFD.

Development of the area, as described above, will result in impacts to Waters of the United States. Permanent stream impacts include enclosures and fills of unnamed tributaries (UNTs) of Enlow Fork, 2 bridge piers locations in Enlow Fork, and 1 wetland fill. Temporary stream impacts will occur due to a pipeline relocation and installation of erosion and sedimentation controls. Total proposed permanent stream and wetland impacts are calculated to be 1,793 linear feet and 0.098 acres, respectively. Total proposed temporary stream impacts are calculated to be 165 linear feet. Drawings of the proposed project are attached to this notice.

MarkWest is proposing to pay into the West Virginia In-Lieu Fee to mitigate the stream and wetland impacts for the project.

5. WEST VIRGINIA CERTIFICATION: This permit decision will not be made until the State of West Virginia, Division of Environmental Protection (WVDEP), issues, denies, or waives State Certification. This public notice does not serve as application to the WVDEP for certification required by Section 401 of the Clean Water Act. The applicant has directly applied to the WVDEP for individual water quality certification. The WVDEP will also consider whether or not the proposed activity will comply with sections 301, 302, 303, 306, 307 of the Clean Water Act or any other appropriate State laws. Any person wishing to comment, provide information, and/or request a public hearing concerning certification for this project should write to the:

West Virginia Department of Environmental Protection
Office of Water Resources
Regulatory Review Program
601 57th Street SE
Charleston, WV 25304-2345
Telephone: 304-926-0499
Re: Public Notice CELRP-OP-F No. [12-35]

6. IMPACT ON NATURAL RESOURCES: The applicant has coordinated with the U.S. Fish and Wildlife Service for review of impacts to federally listed species subject to the Endangered Species Act (ESA). As a result of the coordination efforts, it has been determined that the project may affect, but is not likely to adversely affect the Indiana bat. This determination is detailed in a letter from USFWS, dated March 7, 2012, which explains measures such as seasonal tree cutting restrictions and bat habitat enhancement to be done by the applicant.

7. IMPACT ON CULTURAL RESOURCES: The applicant has coordinated with West Virginia Division of Culture and History for review of impacts to archaeological and/or historical resources subject to Section 106 of the National Historic Preservation Act (NHPA). As a result of the coordination efforts, WVDCH has requested that the applicant conduct a Phase I archeological survey and a determination of eligibility for a building that lies within the project area. The applicant is taking measures to conduct the necessary surveys and coordinate with WVDCH as needed in order to work towards approval.

8. PUBLIC INVOLVEMENT: Any person may request, in writing, within the comment period specified in the paragraph below entitled "RESPONSES," that a public hearing be held to consider this application. The requests for public hearing shall state, with particularity, the reasons for holding a public hearing.

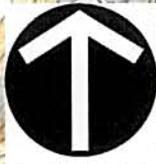

9. EVALUATION: Interested parties are invited to state any objections they may have to the proposed work. The decision whether to issue a permit will be based on an evaluation of the probable impact including cumulative impacts of the proposed activity on the public interest. That decision will reflect the national concern for both protection and utilization of important resources. The benefit which reasonably may be expected to accrue from the proposals must be balanced against its reasonably foreseeable detriments. All factors which may be relevant to the proposal will be considered including the cumulative effects thereof; among those are conservation, economics, aesthetics, general environmental concerns, wetlands, historic properties, fish and wildlife values, flood hazards, flood plain values, land use, navigation, shoreline erosion and accretion, recreation, water supply and conservation, water quality, energy needs, safety, food and fiber production, mineral needs, considerations of property ownership and, in general, the needs and welfare of the people. The Corps of Engineers is soliciting comments from the public; Federal, state, and local agencies and officials; Indian Tribes; and other interested parties in order to consider and evaluate the impacts of this proposed activity. Any comments received will be considered by the Corps of Engineers to determine whether to issue, modify, condition or deny a permit for this proposal. To make this decision, comments are used to assess impacts on endangered species, historic properties, water quality, general environmental effects, and the other public interest factors listed above. Comments are used in the preparation of an Environmental Assessment and/or an Environmental Impact Statement pursuant to the National Environmental Policy Act. Comments are also used to determine the overall public interest of the proposed activity. The evaluation of the impact of the activity on the public interest will include application of the guidelines promulgated by the Administrator, Environmental Protection Agency, under the authority of Section 404(b) of the Clean Water Act (40 CFR Part 230).

10. RESPONSES: A permit will be granted unless its issuance is found to be contrary to the public interest. Written statements concerning the proposed activity should be received in this office on or before the closing date of this Public Notice in order to become a part of the record and to be considered in the final determination. Any objections which are received during this period may be forwarded to the applicant for possible resolution before the determination is made whether to issue or deny the requested DA Permit. All responses to this notice should be directed to the Regulatory Branch, attn Josh Shaffer at the above address, by telephoning (412) 395-7121, or by e-mail at joshua.d.shaffer@usace.army.mil. Please refer to CELRP-OP-F LRP-2012-405 in all responses.
