Michael J. Kirwan Dam & Reservoir, authorized by the Flood Control Act of 1958, is one of 16 flood damage reduction projects in the Pittsburgh District. The reservoir provides flood damage reduction for the Mahoning River Valley and the Beaver and upper Ohio Rivers.

Since its completion in 1965, the Kirwan Reservoir is estimated to have prevented hundreds of millions of dollars in flood damage. The reservoir has the capability to store the equivalent run-off of 18.35 inches of precipitation from its 80.5 square mile watershed. When compared, the $20-million construction cost is outweighed by the reservoir’s flood damage reduction benefits.

The reservoir also stores water for release downstream during dry periods. This has the effect of improving both the quality and quantity of flow in the Mahoning River for domestic and industrial use, recreation, esthetics, and aquatic life.

Recreation
Surrounded by the lush, green farmland of Northern Ohio, Michael J. Kirwan Dam & Reservoir provides miles of clean waters and scenic countryside for your enjoyment. The U.S. Army Corps of Engineers invites you to visit the lake and experience the outdoor opportunities that await you. The reservoir and the majority of its surrounding lands are leased by the Corps of Engineers to the Ohio Department of Natural Resources, highlighting the natural, cultural and historical significance of the reservoir and its surrounding area. You may also experience our unique wildlife platform, where you can see the flora and fauna of the area and maybe even catch a glimpse of wild turkeys.

Fishing at Michael J. Kirwan can be a rewarding activity. The numerous deep feeder channels and shallow shoreline provide habitat for a variety of fish species including walleye, muskie, striped bass, large/smallmouth bass, crappie, and bluegills.

Hiking enthusiasts can spend their time on fourteen miles of trails. The state maintains several hiking trails adjacent to the camping area and an eight mile loop of the Buckeye Trail that traverses the western end of the lake. In addition there are several miles of mountain biking, snow-mobile, cross-country skiing, and bridal trails available. Also available is a horse camp area open by permit only.

If you’re out for an afternoon drive sightseeing, consider stopping at one of our picnic areas at the reservoir. They are conveniently located and are provided with tables, shelters and grills for your enjoyment.

Ideally situated at the end of a long wooded peninsula, the campground features campsites suitable for either trailer or tent camping. Each campsite is equipped with a picnic table, fire ring and electrical hookups. Many sites are accessible to those with disabilities. Campers will find restrooms, shower houses and water stations conveniently located throughout the campground. A camper’s boat launch ramp is available within the campground while some lakeside sites offer boating access.

The modern marina located on the south shore offers marine supplies, docking facilities and boat rentals. There are also three concrete launching ramps maintained on the reservoir and the Fisherman’s Parking Area, located on the north shore adjacent to the causeway.

Come and relax on the state park’s 700-foot beach that provides a view of the Kirwan Dam from your lounge chair and enjoy the breathtaking sunsets. Always remember to watch your children near the water. The swim beach does not provide lifeguards.

Visitors of all ages are invited to explore the rich history and fascinating features of the Visitor Center located on Wayland Road. A series of programs are offered, in conjunction with the Ohio Department of Natural Resources, highlighting the natural, cultural and historical significance of the reservoir and its surrounding area. You may also experience our unique wildlife platform, where...
Enjoy a safe outing. Observe these safety tips!

Water Hazards
Boat with caution! Be especially aware of the existence of underwater obstructions. In addition, floating debris may be at or near the lake surface as a result of fluctuating lake levels. Boaters and skiers should be watchful for these hazards; because of these floating and underwater hazards, diving is discouraged.

Life Jackets
When boating, the best protection against drowning is to wear your life jacket. U.S. Coast Guard approved life jackets are required if you are less than 10 years of age, a non-swimmer, are on a boat less than 16 feet in length, or are in a canoe or kayak. Know the rules before you go out on the water.

Fire Protection
The fire potential is generally high during the recreation season. Help prevent forest fires by obeying the No Open Fire regulation.

Alcohol and Boating Don’t Mix
Don’t drink while operating a boat. Alcohol is involved in at least 50 percent of all drownings and a major cause of death in recreational boating accidents.

Alcoholic beverages are prohibited on all Corps of Engineers lake lands and waters!

Be alert to changing weather/ lake conditions
Storms can come on very quickly. If lightning is spotted, head for shore immediately and seek out a safe location.

Firearms and ammunition
The US Army Corps of Engineers does not honor State-issued concealed weapon permits, prohibits loaded concealed weapons, the possession of loaded firearms or ammunition on lands and waters administered by the US Army Corps of Engineers per 36 C.F.R. § 327.13(a).

Anglers
Use a wading stick to check for sudden drop-offs in the water and for extra balance.

Federal rules and regulations concerning the use of this lake are set forth in Title 36, Chapter III, of the Code of Federal Regulations and are on display in public areas of this lake.
