## NOTICE TO NAVIGATION INTERESTS

---

### Installation of Flashboards Lock and Dam 9, Allegheny River, Mile 62.2

1. **TO WHOM IT MAY CONCERN:** Sithe Energies, Inc. plan to install the temporary flashboard system, river conditions permitting, on Lock and Dam 9, Allegheny River from **May 18 through May 29, 2015**. The flashboard installation will be accomplished between the hours of 6:00 AM and 6:00 PM daily.
2. In association with this work, the upper pool will be temporarily drawn down by the hydropower project approximately to elevation 821.7 to permit installation of steel bars and timber boards across the crest of the dam. This elevation equates to an upper pool gage reading of 8.5 or a water level at 0.5 feet below the crest of the dam. This will result in a total change of approximately 1-foot below the normal pool level.
3. Navigators are cautioned to travel within the limits of the navigation channel during this temporary lowering of the upper pool. In addition marina owners and owners of private docking facilities upstream of the dam may be temporarily affected by this work and the associated pool draw down.
4. The temporary flashboard system is being installed to augment the upper pool elevation to obtain pre-hydro project conditions for environmental and recreation purposes. The temporary flashboard system will consist of 2" x 15" oak timbers secured to the crest of the dam using steel bars and U-bolts. The flashboard system will be installed and maintained by Sithe Energies, Inc. until October 2015.

FOR THE DISTRICT ENGINEER:
